SELCO Announces Commercial Electric Vehicle Charger Rebate Program

SHREWSBURY, Massachusetts – Shrewsbury Electric and Cable Operations is excited to announce a new Commercial EV Charger Rebate program. Shrewsbury businesses can now receive rebates up to \$5,000 per location for installation of EV chargers.

To meet customer desires and better support localized electrification of the transportation sector, SELCO has launched a new Commercial EV Charger Rebate program that provides SELCO commercial, municipal, and industrial customers with an incentive for the installation of electric vehicle charging equipment. Qualifying projects are eligible for different levels of funding depending on charging level capabilities, up to \$5,000 per property. Projects may also qualify for funding through the MasseVIP grant program offered by the Massachusetts Department of Environmental Protection.

This rebate program is one of the many ways SELCO is supporting a clean energy future. Closely tied to this charging program is the SELCO EV Rebate program, which provides SELCO residential customers with a rebate for the purchase or lease of new or used battery electric vehicles (BEVs) and plug-in hybrid electric vehicles (PHEVs). While lowering the upfront cost of EVs to our customers is an important aspect of supporting EV adoption, another equally important aspect is supporting the development of EV charging infrastructure in Shrewsbury so that it becomes commonplace, not a rarity. The new Commercial EV Charger Rebate Program will help meet this objective. Visit [SELCO.ShrewsburyMA.gov/ev](https://www.selco-shrewsburyma.gov/ev) for program details.

SELCO is a community owned and operated utility serving Shrewsbury, Massachusetts. SELCO provides high-quality electric, cable, telephone, and internet services at competitive prices to residential and commercial customers within the Town of Shrewsbury.
