(AKA Shrewsbury Electric and Cable Operations - SELCO)

## **Residential Rate (R-1)**

Bill Code 1R

**Effective March 1, 2026**

**MDPU # 201**  
**(Cancels MDPU # 191)**

**Availability** - Service under this rate is available to all residential customers for all domestic uses in private residences or individual apartments of multiple dwellings.

**Rate:**

Customer Charge	\$ 13.17 per month
Distribution Charge	\$ 0.0448 per kWh
Transmission Charge	\$ 0.0297 per kWh
Generation Charge	\$ 0.0851 per kWh
NYPA Credit	(see below)
Generation and Transmission Adjustment	(see below)

**Multiple Dwelling** - When separate metering or service to individual apartments of multiple dwellings is impracticable, service may be furnished through a single meter but the kWh in each block and the Customer Charge will be multiplied by the number of dwellings connected.

**Minimum Bill** – Shall be equal to the Customer Charge.

**Customer Charge** – is a monthly fixed charge which applies to all customers. It is designed to recover costs related to metering, meter reading, billing and other administrative costs.

**Transmission Charge** – is the charge that recovers the cost to transport electricity from remote generating facilities where it is produced, to the SELCO service territory.

**Generation Charge** – is the cost for the electric power produced at power plants or purchased from the wholesale market. This charge covers the general categories of expenses including fuel or energy costs and capacity costs.

**Distribution Charge** – is the charge that recovers the cost of delivering electric power over SELCO's local distribution system to the customer's location.

**NYPA Credit** – is the savings as determined by SELCO from time to time, passed on to residential customers and is the result of low cost, federally licensed hydroelectric power projects in the State of New York that we receive power from. The NYPA Credit will be calculated periodically in accordance with MDPU Schedule No. 178.

**Generation and Transmission Adjustment** – is an adjustment, either a charge or a credit, to the Generation and Transmission Charges to reflect changes in the cost of power purchased by SELCO and transported to the SELCO service territory. The Generation and Transmission Adjustment will be calculated periodically in accordance with MDPU Schedule No. 163.

**Farm Discount** - Customers who meet the eligibility requirements for being engaged in the business of agriculture or farming as defined in M.G.L. Chapter 128 Section 1a at their service location are eligible for an additional discount from their distribution service rates. The discount will be calculated as 10% of the customer's total bill for service provided by the company before application of this discount. Customers who meet the requirements of this section must provide the company with appropriate documentation of their eligibility under this provision.

**Terms and Conditions** - The Light Department's terms and conditions in effect from time to time, where not inconsistent with this rate, are incorporated as part of this rate.

# Town of Shrewsbury Municipal Light Department

(AKA Shrewsbury Electric and Cable Operations - SELCO)

## Income Qualified Residential Rate (IQR)

Bill Code IQR

Effective March 1, 2026

MDPU # 215

**Availability** - Service under this rate is available to qualified residential customers for all domestic uses in private residences or individual apartments of multiple dwellings. Eligibility for this rate is based on documented economic need. Application forms are available from SELCO and are re-evaluated annually.

**Rate:**

Customer Charge	\$ 0 per month
Distribution Charge	\$ 0.0448 per kWh
Transmission Charge	\$ 0.0297 per kWh
Generation Charge	\$ 0.0851 per kWh
NYPA Credit	(see below)
Generation and Transmission Adjustment	(see below)

**Multiple Dwelling** - When separate metering or service to individual apartments of multiple dwellings is impracticable, service may be furnished through a single meter but the kWh in each block and the Customer Charge will be multiplied by the number of dwellings connected.

**Customer Charge** – is a monthly fixed charge which applies to all customers. It is designed to recover costs related to metering, meter reading, billing and other administrative costs.

**Commercial Rate (C)**

Bill Code 3C

**Effective March 1, 2026**

**MDPU # 206**  
**(Cancels MDPU # 196)**

**Availability** - Service under this rate is available for all uses by commercial and industrial customers, with a 12- (twelve) month average usage of less than 10,000 kWh.

**Character of Service** - Voltage available under this rate is 120/240 volt single phase, 120/208 volt three phase and 240, 480 volt, or 277/480 volt three phase.

**Rate:**

Customer Charge	\$17.65 per month
Distribution Charge	\$0.0579 per kWh
Transmission Charge	\$0.0351 per kWh
Generation Charge	\$0.1038 per kWh
Generation and Transmission Adjustment	(see below)

**Minimum Bill** – shall be equal to the Customer Charge.

**Customer Charge** – is the cost to open and keep an electric account open, including metering and billing services. This charge is not dependent on the amount of electricity used.

**Transmission Charge** – is the utility's cost to move bulk electricity from the power plants over the transmission lines to the local substations. This charge is based on federally regulated charges.

**Generation Charge** – is the cost for the electric power produced at power plants or purchased from the wholesale market. This charge covers the general categories of expenses including fuel or energy costs and capacity costs.

**Distribution Charge** – is the cost to deliver electricity to our customers. This charge covers the costs to build and maintain the local electric system including substations, transformers, poles, wires and other consumer services.

**Generation and Transmission Adjustment** – is an adjustment, either a charge or a credit, to the Generation and Transmission Charges to reflect changes in the cost of power purchased by SELCO and transported to the SELCO service territory. The Generation and Transmission Adjustment will be calculated periodically in accordance with MDPU Schedule No. 163.

**Farm Discount** - Customers who meet the eligibility requirements for being engaged in the business of agriculture or farming as defined in M.G.L. Chapter 128 Section 1a at their service location are eligible for an additional discount from their distribution service rates. The discount will be calculated as 10% of the customer's total bill for service provided by the company before application of this discount. Customers who meet the requirements of this section must provide the company with appropriate documentation of their eligibility under this provision.

**(Cancels MDPU # 198)**

SELCO and transported to the SELCO service territory. The Generation and Transmission Adjustment will be calculated periodically in accordance with MDPU Schedule No. 163.

**Demand Charge** - the charge that recovers a portion of the cost of SELCO's local infrastructure that is needed to meet the customer's peak electricity needs.

**Billing Demand** - Maximum 15 minutes measured kW demand in the month, but not less than 80% of the maximum demand established during the preceding 11 months. A 15-minute demand established during the preceding 11 months before application of this rate will become the billing demand under this rate.

**Power Factor Adjustment** – SELCO may at its option, require the Customer to make such changes in equipment and/or operations as necessary to increase the Customer's power factor to a minimum of 90% lagging, or be billed 90% of the maximum 15 minutes measured KVA demand in the month to compensate for operation at the lower power factor.

**Farm Discount** - Customers who meet the eligibility requirements for being engaged in the business of agriculture or farming as defined in M.G.L. Chapter 128 Section 1a at their service location are eligible for an additional discount from their distribution service rates. The discount will be calculated as 10% of the customer's total bill for service provided by the company before application of this discount. Customers who meet the requirements of this section must provide the company with appropriate documentation of their eligibility under this provision.

**Terms and Conditions** - The Light Department's terms and conditions in effect from time to time, where not inconsistent with this rate, are incorporated as part of this rate.

**Transformer Ownership and Primary Metering Discount** - 3% discount when energy is metered at 4160 volt and above, and SELCO is not required to furnish the transformers.

# Town of Shrewsbury Municipal Light Department

(AKA Shrewsbury Electric and Cable Operations - SELCO)

## Residential Net Metered Rate (NR-1)

Bill Code NR1

Effective March 1, 2026

MDPU # 204  
(Cancels MDPU #194)

**Availability** - Service under this rate is available to all residential customers for all domestic uses in private residences or individual apartments of multiple dwellings, with behind the meter generation approved by SELCO.

**Rate:**

Customer Charge	\$ 13.17 per month
Distribution Charge	\$ 0.0448 per kWh
Transmission Charge	\$ 0.0297 per kWh
Generation Charge	\$ 0.0851 per kWh
Distribution Standby Charge	\$ 4.50 per installed kW AC
NYPA Credit	(see below)
Generation and Transmission Adjustment	(see below)

**Multiple Dwelling** - When separate metering or service to individual apartments of multiple dwellings is impracticable, service may be furnished through a single meter but the kWh in each block and the Customer Charge will be multiplied by the number of dwellings connected.

**Minimum Bill** – Shall be equal to the Customer Charge.

**Customer Charge** – is a monthly fixed charge which applies to all customers. It is designed to recover costs related to metering, meter reading, billing and other administrative costs.

**Transmission Charge** – is the charge that recovers the cost to transport electricity from remote generating facilities where it is produced, to the SELCO service territory.

**Generation Charge** – is the cost for the electric power produced at power plants or purchased from the wholesale market. This charge covers the general categories of expenses including fuel or energy costs and capacity costs.

**Distribution Charge** – is the charge that recovers the cost of delivering electric power over SELCO's local distribution system to the customer's location.

**NYPA Credit** – is the savings as determined by SELCO from time to time, passed on to residential customers and is the result of low cost, federally licensed hydroelectric power projects in the State of New York that we receive power from. The NYPA Credit will be calculated periodically in accordance with MDPU Schedule No. 178.

**Distribution Standby Charge** – is the charge to net metered installations to ensure that the cost of maintaining the electrical distribution system is shared fairly among all of SELCO's rate payers including those who have reduced their financial contribution towards these services by replacing some of the energy purchased from SELCO with energy generated by customer owned equipment. Customers with on-site generation continue to receive all of the services provided by the electric distribution system during times when it is required to supply electricity when the on-site generation is not available as well as times when the on-site generation is exported to the SELCO distribution system.

**Generation and Transmission Adjustment** – is an adjustment, either a charge or a credit, to the Generation and Transmission Charges to reflect changes in the cost of power purchased by SELCO and

## Commercial Net Metered Rate (NC-1)

Bill Code NC

Effective March 1, 2026

MDPU # 207  
(Cancels MDPU # 197)

**Availability** - Service under this rate is available for all uses by commercial and industrial customers, with a 12- (twelve) month average usage of less than 10,000 kWh and with behind the meter generation approved by SELCO.

**Character of Service** - Voltage available under this rate is 120/240 volt single phase, 120/208 volt three phase and 240, 480 volt, or 277/480 volt three phase.

<b>Rate:</b>	Customer Charge	\$15.53 per month
	Distribution Charge	\$0.0329 per kWh
	Transmission Charge	\$0.0282 per kWh
	Generation Charge	\$0.1029 per kWh
	Generation and Transmission Adjustment	(see below)
	Distribution Standby Charge	\$4.50 per installed kW AC

**Minimum Bill** – shall be equal to the Customer Charge

**Customer Charge** – is the cost to open and keep an electric account open, including metering and billing services. This charge is not dependent on the amount of electricity used.

**Transmission Charge** – is the charge that recovers the cost to transport electricity from remote generating facilities where it is produced, to the SELCO service territory.

**Generation Charge** – is the cost for the electric power produced at power plants or purchased from the wholesale market. This charge covers the general categories of expenses including fuel or energy costs and capacity costs.

**Distribution Charge** – is the cost to deliver electricity to our customers. This charge covers the costs to build and maintain the local electric system including substations, transformers, poles, wires and other consumer services.

**Generation and Transmission Adjustment** – is an adjustment, either a charge or a credit, to the Generation and Transmission Charges to reflect changes in the cost of power purchased by SELCO and transported to the SELCO service territory. The Generation and Transmission Adjustment will be calculated periodically in accordance with MDPU Schedule No. 163.

**Farm Discount** - Customers who meet the eligibility requirements for being engaged in the business of agriculture or farming as defined in M.G.L. Chapter 128 Section 1a at their service location are eligible for an additional discount from their distribution service rates. The discount will be calculated as 10% of the customer's total bill for service provided by the company before application of this discount. Customers who meet the requirements of this section must provide the company with appropriate documentation of their eligibility under this provision.

## General Service Net Metered Rate (NMGS-1)

Bill Code NMGS-1

Effective March 1, 2026

MDPU # 209  
(Cancels MDPU # 199)

### Availability:

Service under this rate is available for all uses by commercial or industrial customers with a 12-month average kWh usage greater than 10,000 kWh and less than 200 kW/month demand and with behind the meter generation approved by SELCO.

A customer may be transferred from the GS-1 rate at the option of SELCO if the customer fails to meet the availability criteria.

No service will be furnished hereunder to a customer for resale in whole or in part within SELCO's service territory.

### Character of Service:

120/240 volt single phase, 120/208, 240, 480, or 277/480, 4160 volt three phase and 13,800 volt three phase.

### Rate:

Customer Charge	\$85.40 per month
Distribution Charge	\$0.0381 per kWh
Transmission Charge	\$0.0284 per kWh
Generation Service Charge	\$0.1037 per kWh
Generation and Transmission Adjustment	(see below)
Demand Charge	\$ 7.60/kW
Distribution Recovery Charge	\$ 4.00 per installed kW in excess of 50% of Billing Demand

**Minimum Bill** – shall be equal to the Customer Charge

**Customer Charge** – is a monthly fixed charge which applies to all customers. It is designed to recover costs related to metering, meter reading, billing and other administrative costs.

**Transmission Charge** – is the charge that recovers the cost to transport electricity from remote generating facilities where it is produced, to the SELCO service territory.

**Generation Charge** – is the cost for the electric power produced at power plants or purchased from the wholesale market. This charge covers the general categories of expenses including fuel or energy costs and capacity costs.

**Distribution Charge** – is the charge that recovers the cost of delivering electric power over SELCO's local distribution system to the customer's location.

**Generation and Transmission Adjustment** – is an adjustment, either a charge or a credit, to the Generation and Transmission Charges to reflect changes in the cost of power purchased by SELCO and transported to the SELCO service territory. The Generation and Transmission Adjustment will be calculated periodically in accordance with MDPU Schedule No. 163.

# **Town of Shrewsbury Municipal Light Department**

## **General Service Net Metered Rate (NMGS-1)**

Bill Code NMGS-1

**Effective March 1, 2026**

**MDPU # 209  
(Cancels MDPU # 199)**

**Demand Charge** - the charge that recovers a portion of the cost of SELCO's local infrastructure that is needed to meet the customer's peak electricity needs.

**Billing Demand** - Maximum 15 minutes measured kW demand in the month, but not less than 80% of the maximum demand established during the preceding 11 months. A 15-minute demand established during the preceding 11 months before application of this rate will become the billing demand under this rate.

**Power Factor Adjustment** – SELCO may at its option, require the Customer to make such changes in equipment and/or operations as necessary to increase the Customer's power factor to a minimum of 90% lagging, or be billed 90% of the maximum 15 minutes measured KVA demand in the month to compensate for operation at the lower power factor.

**Farm Discount** - Customers who meet the eligibility requirements for being engaged in the business of agriculture or farming as defined in M.G.L. Chapter 128 Section 1a at their service location are eligible for an additional discount from their distribution service rates. The discount will be calculated as 10% of the customer's total bill for service provided by the company before application of this discount. Customers who meet the requirements of this section must provide the company with appropriate documentation of their eligibility under this provision.

**Terms and Conditions** - The Light Plant's terms and conditions in effect from time to time, where not inconsistent with this rate, are incorporated as part of this rate.

**Transformer Ownership and Primary Metering Discount** - 3% discount when energy is metered at 4160 volt and above, and SELCO is not required to furnish the transformers.

**Distribution Recovery Charge** – is the charge to net metered installations to ensure that the cost of maintaining the electrical distribution system is shared fairly among all of SELCO's rate payers including those who have reduced their financial contribution towards these services by replacing some or all of the energy purchased from SELCO with energy generated by customer owned equipment. Customers with on-site generation continue to receive all of the services provided by the electric distribution system during times when it is required to supply electricity when the on-site generation is not available as well as times when the on-site generation is exported to the SELCO distribution system. For General Service customers, this charge is applied when the maximum system output of customer generation systems are greater than 50% of the customer's Billing Demand. The charge applies to the portion of the system maximum system output in kW that exceeds 50% of Billing Demand.

## Protective Outdoor Lighting (PL)

Bill Code PL

Effective March 1, 2026

MDPU #211

Cancels MDPU #164

### 1.) AVAILABILITY

Protective outdoor lighting is available under this rate to any customer where the necessary fixtures can be supported directly from existing poles and where service can be supplied directly from existing secondary voltage circuits. Where necessary, fixtures that cannot be supported from an existing pole, a wood pole may be furnished in accordance with pole charge listed in this rate.

### 2.) TERMS

Shrewsbury Electric & Cable Operations (SELCO) will furnish, install, maintain, and supply power as required to operate protective lighting from dusk to dawn. The customer requesting protective lighting service under this rate agrees to maintain the service for a minimum of three years.

### 3.) RATES

#### a.) LIGHTING

##### *Fixed Charges:*

The Low Floodlight category is for lower-wattage output lights, while the High Floodlight category is for higher-wattage output light, as determined by SELCO.

##### Low Floodlight

Light Charge: \$25 per light per month

##### High Floodlight

Light Charge: \$26 per streetlight per month

##### Streetlight

Streetlight Charge: \$19 per light per month

##### *Kilowatt-Hour Charges:*

The below per kilowatt-hour rates apply to all light types including non-LED lights and LED lights.

Distribution Charge: \$0.0640/kWh

Transmission Charge: \$0.0296/kWh

Generation Charge: \$0.1020/kWh

Generation and Transmission Adjustment

(see below)

**Streetlight/Light Charge** – is a fixed charge per lighting. It is designed to recover costs related to billing and other administrative costs.

**Transmission Charge** – is the charge that recovers the cost to transport electricity from remote generating facilities where it is produced, to the SELCO service territory.

**Generation Charge** – is the cost for the electric power produced at power plants or purchased from the wholesale market. This charge covers the general categories of expenses including fuel or energy costs and capacity costs.

**Distribution Charge** – is the charge that recovers the cost of delivering electric power over SELCO's local distribution system to the customer's location.

**Generation and Transmission Adjustment** – is an adjustment, either a charge or a credit, to the Generation and Transmission Charges to reflect changes in the cost of power purchased by SELCO and transported to the SELCO service territory. The Generation and Transmission Adjustment will be calculated periodically in accordance with MDPU Schedule No. 163.

b) POLE RENTAL: \$17 per pole per month

c.) NEW INSTALLATION

The customer will pay SELCO a one-time equipment and installation charge as determined by SELCO from time to time, per unit in addition to the charges listed in Section 3a.

In all cases, the pole to be set shall be no further than 150' from an existing pole, on public or private way, used for the purpose of supporting conductor to provide electric service.

“Easement” or “Right of Entry” releases for the pole and conductors on private property shall be furnished by the customer at no cost to SELCO.

4.) TIME OF OPERATION

“Protective Outdoor Lighting” will be lit every evening from approximately one-half hour after sunset until approximately one-half hour before sunrise. Approximately 4380 Annual Hours of Operation will be assumed, except where lights are directly metered. Burned out lamps will be replaced by SELCO on notification by the customer. No reduction in billing will be allowed for lamp outages.
